Contemporary Dining Room

Photograph by Beth Singer

1st – Nosan Signature Homes, with Gallery Steel

The dining room is the first room seen from the entryway of this home, and provides unobstructed views of the lake and greenery beyond through its 12-foot-high, floor-to-ceiling and wall-to-wall glazing. A buffet appears to float in the 14-foot width, which was accomplished with a steel beam concealed within the cabinetry. The owner wanted to ensure that the light fixture was a focal point.
